TITLE JOURNAL REFERENCE AUTHORS TITLE JOURNAL REFERENCE AUTHORS TITLE AUTHORS TITLE JOURNAL EFERENCE AUTHORS JOURNAL JOURNAL REFERENCE COMMENT

CLONE LENGTH: This sequence does not necessarily represent the entire insert of this clone. Overlapping regions of clones are only sequenced and submitted once, so the sequence for the remainder of the insert may be found in the record for the adjacent clones. Overlapping clones are noted at the beginning and end of the

STSs are identified using ePCR (Genome Res. 7:541-550) searches of a local database that includes entries from dbSTS, GDB, and local mapping efforts.

Repeats are identified using RepeatMasker (A. Smit and P. Green, ANNOTATION OF FEATURES: Features listing.

flanked by consensus splice sites that maintained sequence continuity across the splice junctions. Sequences that are not identical matches are annotated as similar. unpublished.) for Human and Mouse sequences.
Genes and Region of sequence similarity are identified by (Nuc. Acids Res. 25.3389-3402) similarity (expect < 1e-34) to EST and cDNA sequences. Genes demonstrate at least two exons

SEQUENCING READ COVERAGE:Sequencing is completed to a minimum standard of double strand coverage with a minimum of 2 clones and 2 reads with no ambiguities or 2 chemistries with a minimum of 2 clones and 3 reads with no ambiguities. If the sequence quality for a region does not meet this standard, it will be indicated in the annotation as Low Coverage.

BLOSUM62 Gapop 10.0 , Gapext 0.5 Scoring table:

Total number of hits satisfying chosen parameters:

283308 seqs, 96168682 residues

Searched:

Minimum DB seq length: 0 Maximum DB seq length: 200000000

Post-processing: Minimum Match 0% Maximum Match 100% Listing first 45 summaries

Database :

PIR\_76:\*
1: pir1:\*
2: pir2:\*
3: pir3:\*

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Description

US-10-071-179-29
Sequence 29, Application US/10071179
Publication No. US20030108882A1
GENERAL INFORMATION:
TUTLE OF INVENTION: A NUCLEIC ACID ENCODING A RETINOBLASTOMA BINDING PROTEIN (RBP-7)
TITLE OF INVENTION: AN UCLEIC ACID ENCODING A RETINOBLASTOMA BINDING PROTEIN (RBP-7)
TITLE OF INVENTION: AND POLYMORPHIC MARKERS ASSOCIATED WITH SAID NUCLEIC ACID.
TITLE OF INVENTION: AND POLYMORPHIC MARKERS ASSOCIATED WITH SAID NUCLEIC ACID.
CURRENT APPLICATION NUMBER: US/10/071,179

Publication No. US20030232419A1

GENERAL INFORMATION:

APPLICANT: THE JOHN'S HOPKINS UNIVERSITY SCHOOL OF MEDICINE

APPLICANT: TERMAN, John R.

APPLICANT: TERMAN, John R.

APPLICANT: PASTERRAMP, Ronald J.

APPLICANT: MOLECULES INTERACTING WITH CASL (MICAL) POLYNUCLEOTIDES, POLYNI

TITLE OF INVENTION: MOLECULES INTERACTING THE SAME

FILE REPERENCE: JHU1840-3

CURRENT APPLICATION NUMBER: US 60/388,325

FRIOR FILING DATE: 2002-06-13

PRIOR APPLICATION NUMBER: US 60/384,302

PRIOR APPLICATION NUMBER: US 60/384,302

PRIOR APPLICATION NUMBER: US 60/354,178

PRIOR APPLICATION NUMBER: US 60/354,178
